Self Vulcanizing Tape Instructions

THE FOLLOWING STEPS SHOW HOW TO PROPERLY APPLY THE “SELF VULCANIZING TAPE” INCLUDED IN PAINLESS PERFORMANCE “POWER BRAID” AND “CLASSIC BRAID” KITS.

STEP ONE: Need Scissors and Self Vulcanizing Tape

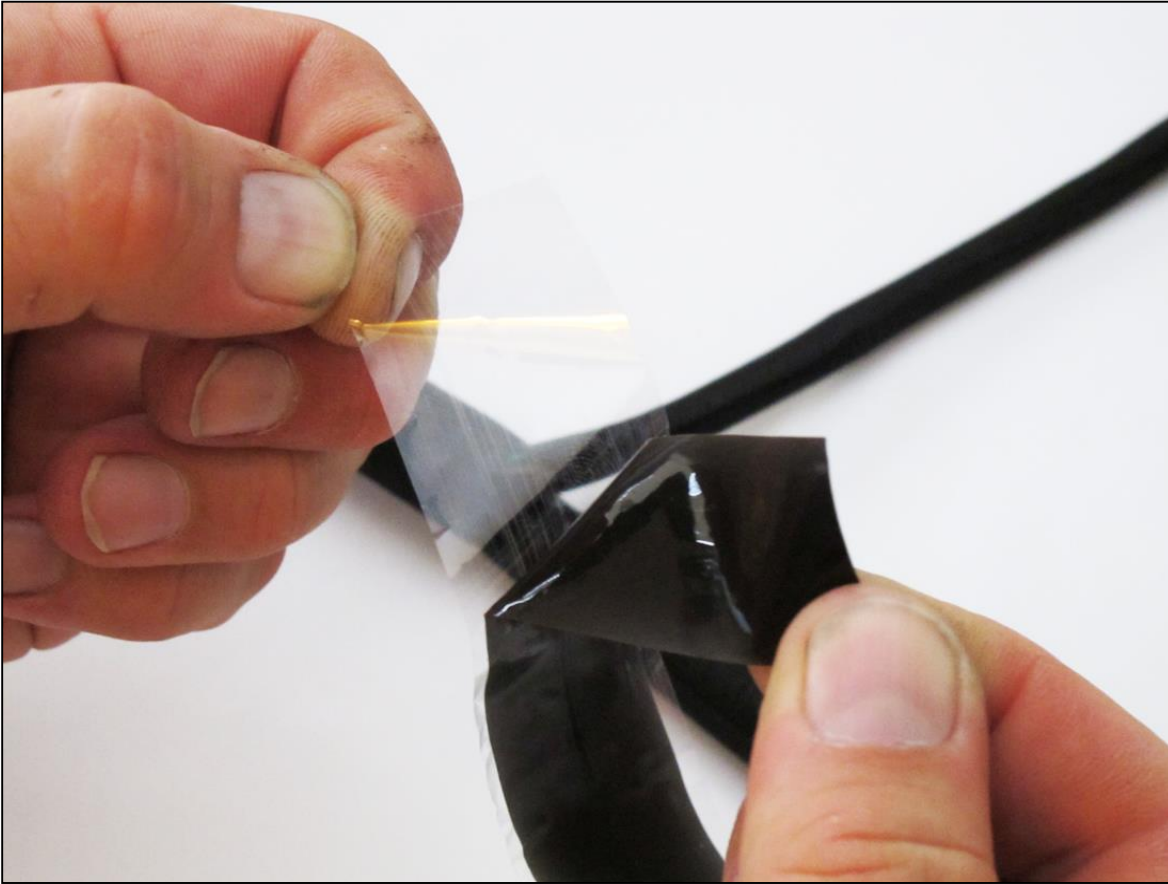

STEP TWO: Pull approximately 4 inches from the roll.

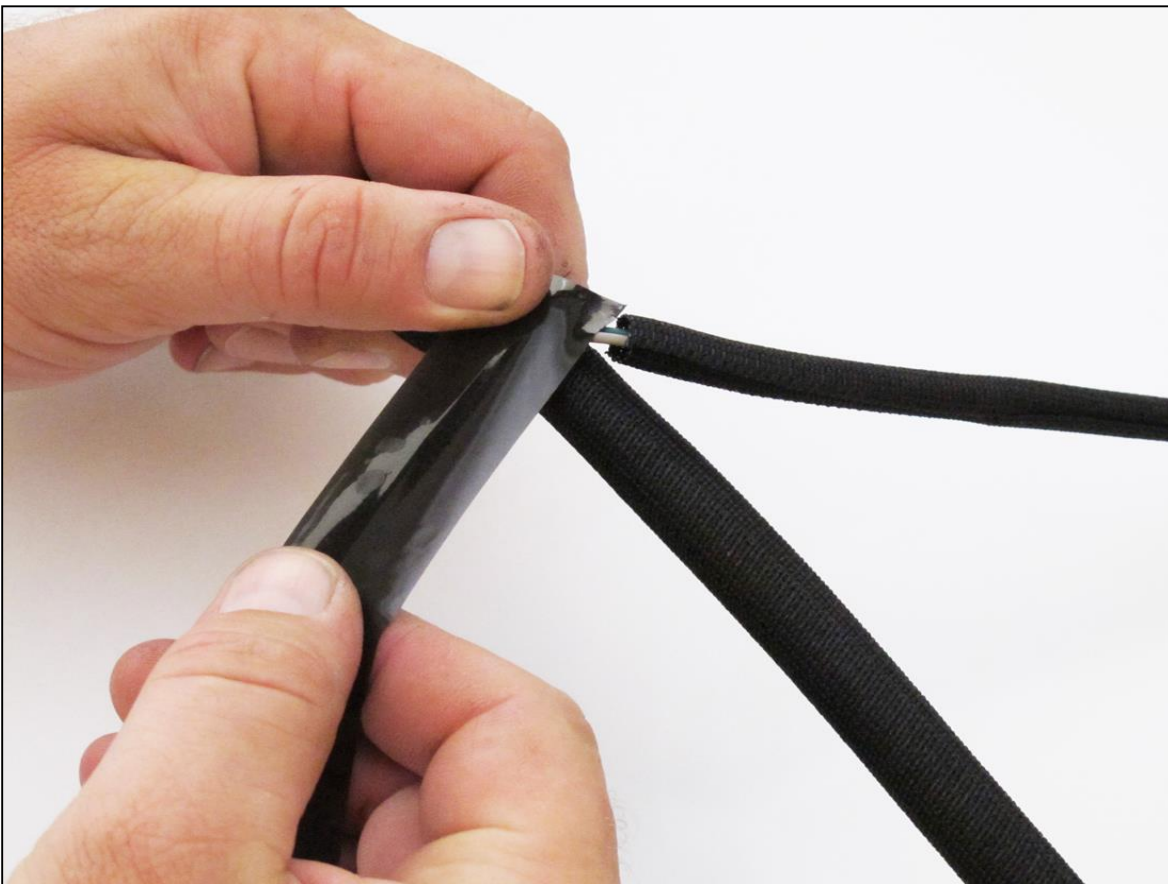

STEP THREE: Cut the 4" piece off with scissors.

STEP FOUR: Peel off the clear plastic liner.

STEP FIVE: While stretching the tape over the breakout make a full wrap around the loomed wires.

STEP SIX: While stretching out the tape wrap it around the other breakouts.

STEP SEVEN: Be sure to maintain tension on the tape while wrapping the breakout.

STEP EIGHT: Here's an example of a finished breakout.

Helpful Tools to assist in the application of Power/Classic Braid.

- **P/N 70940 – 1" Tool**
- **P/N 70941 – 3/8", 1/2" & 3/4" Tool Kit**

Painless Performance Limited Warranty and Return Policy

Chassis harnesses, fuel injection harnesses and Striker Coldshot are covered under a lifetime warranty. All other products manufactured and/or sold by Painless Performance are warranted to the original purchaser to be free from defects in material and workmanship under normal use. Painless Performance will repair or replace defective products without charge during the first 12 months from the purchase date. No products will be considered for warranty without a copy of the purchase receipt showing the sellers name, address and date of purchase. You must return the product to the dealer you purchased it from to initiate warranty procedures.

Note: A full color copy of these instructions can be found at www.painlessperformance.com
