HB5 Series Bulb

Headlight Relay Conversion Harness Installation Instructions

1. Disconnect the battery.
2. Mount the fuses and relays in a suitable location away from the exhaust manifolds, between the battery or battery source and headlights. Self tapping screws are supplied in this kit for mounting the relays and fuses.
3. Route the Red Power wire to the POSITIVE side of the battery or a 12 VOLT battery source and cut to length. Terminate the Red wire with the appropriate ring terminal (supplied in kit) and make the connection.
4. Route the Black Ground wire to the NEGATIVE side of the battery or a known good GROUND and cut to length. Terminate the Black wire with the appropriate ring terminal (supplied in kit) and make the connection.
5. Unplug the old headlight connectors from the headlight bulbs; refer to your owner's manual for headlight removal for your specific vehicle.

NOTE: Any new harness wire may be cut to length for proper fit.

7. Using the diagrams on the back of this page splice the new headlight wires into factory headlight wires according to the type of bulb you are using.
8. The left over old headlight connector will not be used. Tape and store it out of the way.
9. Turn on headlights and check for proper operation.

Painless Performance Limited Warranty and Return Policy

Chassis harnesses and fuel injection harnesses are covered under a lifetime warranty. All other products manufactured and/or sold by Painless Performance are warranted to the original purchaser to be free from defects in material and workmanship under normal use. Painless Performance will repair or replace defective products without charge during the first 12 months from the purchase date. No products will be considered for warranty without a copy of the purchase receipt showing the sellers name, address and date of purchase. You must return the product to the dealer you purchased it from to initiate warranty procedures.
